Supplement to the
"Proceedings of the Indian Academy of Sciences"

INDEX TO VOL. XLVII—(A)

AUTHORS' INDEX

Ahluwalia, V. K., Krishnaswami, N. R., Mukerjee, S. K., Murti, V. V. S., Seshadri, T. R. and Venkataramani, C.	The factors that affect alkali colour reactions of flavonols: a study of flavanols of uncommon types, 230.
Bhattacharjee, S. K., Raman, Shree and Mitra, S. K.	Radioactive decay of Eu^{154}, 295.
Dianine, S. A. ..	Sur la Résolution du Probleme de Raman-Dey, 116.
Goel, R. N. and Seshadri, T. R.	New synthesis of tamaraxetin, alpinone, and izalpinin, 191.
Goel, R. N., Mahesh, V. B. and Seshadri, T. R.	Modifications in the iodine oxidation of hydroxy flavanones and their methyl ethers, 184.
Govindachari, T. R., Pai, B. R., Rajadurai, S. and Rao, U. Ramadas	Alkaloids of *Mahonia nepalensis* D.C., 41.
Gupta, S. L. ..	Effect of methyl orange on the capacity of the dropping mercury electrode, 254.
Janakiramaiah, B. and Ramana, E. V.	Geophysical investigations near the old workings for copper in Yanambail area, Khammam District, Andhra Pradesh, 310.
Jayaraman, A. ..	Reciprocal lattice photography, 142.
..	Unit cell parameters, space-group and optical properties of cobalt nitrate hexahydrate, 147.
Jones, W. F. K. Wynne ..	*See* Sanghi and Jones.
Kane, R. P. and Rao, U. R.	Zenith angle response of a vertical meson telescope, 30.
Kanthamani, S. ..	Heterocyclic compounds, XII, 175.
Khan, N. A. ..	The characteristic roots of the product of two matrices, 348.

TITLE INDEX

Amethystine quartz, optic interference figures, I, II (Pancharatnam), 201, 210.

Anharmonicity of vibration in molecules (Viswanathan), 85.

Anomalous dispersion method of determining structure and absolute configuration of crystals (Raman), 1.

Benzopyrone series, synthetic experiments, LXVII (Sarin and others), 292.

Characteristic roots of the product of two matrices (Khan), 348.

Charge independence and nucleon—antinucleon interactions (Srinivasan), 365.

Cobaltic acetylacetonate $Co(C_5H_7O_2)_3$, the crystal structure (Padmanabhan), 329.

Cobalt nitrate hexahydrate, unit-cell parameters, space-group and optical properties (Jayaraman), 147.

Copper in Yanambail area, Khammam District, Andhra Pradesh, geophysical investigations near the old workings for (Janakiramaiah and Ramana), 310.

Crystals, cubic, thermo-elastic behaviour (Subrahmanyam), 25.

Diamond, the diffraction of X-rays, I, II (Raman), 263, 335.

Dipole moments and molecular structure of formyl and acetyl compounds (Raman and Soundararajan), 357.

Dropping mercury electrode, effect of methyl orange on the capacity of (Gupta), 254.

Emission spectrum of bromine excited in the presence of argon, III (Verma), 196.

Emission spectrum of iodine bromide excited in the presence of argon, I, II (Venkateswarlu and Verma), 150, 161.

Flavonols, the factors that affect alkali colour reactions: a study of flavonols of uncommon types (Ahluwalia and others), 230.

Flavanones, hydroxy, and their methyl ethers, iodine oxidation, modifications (Goel and others), 184.

Heterocyclic compounds, XI (Krishnan), 98; XII (Kanthamani), 175; XIII (Raman), 244.

Heterocyclic rings containing nitrogen, formation, studies, IV, V (Rao and Ratnam), 77, 81.

Lorentz group, physical applications (Rao), 105.

Mahonia nepalensis D.C., alkaloids (Govindachari and others), 41.

Meson telescope, vertical, zenith angle response (Kane and Rao), 30.

Metallic halide-dioxanates, studies, I (Nair and Moosath), 344.

Numbers, positive rational, the enumeration (Srinivasan), 12.

p-Azo-toluene (CH_3–$C_6H_4N)_2$, the crystal sturcture (Padmanabhan and others), 323.

Polarographic behaviour of organic iodocompounds, I (Ramanathan and Subrahmanya), 379.

Polycyclic hydrocarbons, I (Lakshmanan), 369.

Problem de Raman-Dey, résolution (Dianine), 116.

Quantum mechanics, transformations in the functional space (Vachaspati), 179.

Radioactive decay of Eu^{154} (Bhattacharjee and others), 295.

Raman spectrum of quartz and its interpretation (Krishnamurti), 276.

Reciprocal lattice photography (Jayaraman), 142.

Tamara..etin, alpinone and izalpinin, new synthesis (Goel and Seshadri), 191.

Thorium, gravimetric determination, and its separation from uranium cerite earths and ceric salts (Saxena and Seshadri), 238.

Thorium oxalate with ammonium oxalate, complex compounds of (Kurup and others), 373.

Vertical soundings at Ahmedabad during partial solar eclipse on 14th December 1955 (Rastogi), 65.

Zinc in alkaline solutions, electrochemical behaviour, I (Sanghi and Jones), 49.
